

With Genesis Express for Hospitality, Maximizing your Profits has Never Been Easier!

With our affordable **Genesis Express Call Accounting System** generating profits from your telephone system has never been easier. We know how to build a system that will transform your telephone system into a cash generating machine, with industry leading features you can count on to ensure your system is always billing and collecting correctly, providing you a peace of mind.

Outstanding Features include:

- Every call is captured and billed in real time and available for reporting
- Increase your revenue by adding various surcharges and markups from 1-100%
- Calls are transferred to your PMS in real time
- Accurate and simplified checkout reports for efficient customer service
- Eliminate or reduce manual record keeping
- Easily add additional sites
- Unlimited call capacity
- Control abuse and misuse of the telephone
- Built with the most accurate rate table system using V & H coordinates
- Compatible with all PBX systems including Nortel, Avaya, Mitel, BCM, Cisco, and many more.
- Interfaces with any PMS solution
- Run over 100 different customizable reports and automatically have them emailed or saved

GenAssist

With GenAssist, troubleshooting or setting up your system can be done remotely by one of our highly trained technicians.

GenGuard

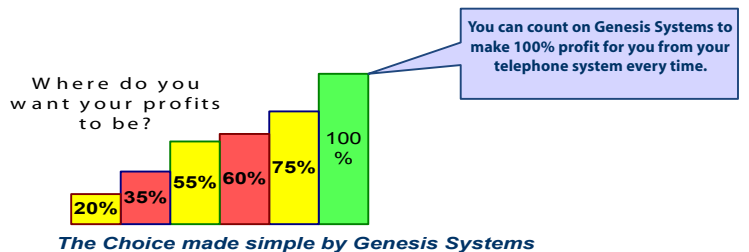

GenGuard is an advanced feature added to the system that will notify Genesis via the internet that your system has encountered an error. Once we receive a notification, a Genesis technician will contact you and resolve the issue.

Product Enhancements

Any changes made to the system are included in yearly updates which means you will receive a complete new system with the latest features and enhancements.

Directory Table Updates

Directory Table updates ensure new numbers or features your telecommunications service provider adds throughout the year are reflected in your system. We stay on top of it so you don't have to!
